

Input data upload manual

1. Accepted types of media used for input data

CD-R/RW, DVD-R/+R/RW, external media connectable via USB 1.0, USB 2.0 or FireWire interfaces (USB key, external HDD...)

2. Kodak InSite WebProof portal

<http://insite.polygrafprint.sk>

- Username and Password on demand
- connection speed up to 6Mb/s
- access via www browser, updated Internet Explorer or Safari browsers are recommended
- interactive mode data upload, corrections, viewing and approving of processed pages

3. FTP server

<ftp://mail.polygrafprint.sk>

- Username and Password on demand
- connection speed up to 6Mb/s
- in case of overload it is also possible to use an alternative FTP server

4. Alternative FTP server

<ftp://ftp.polygrafprint.eu>

- Username and Password on demand
- connection speed up to 100Mb/s (attached directly to SIX - Slovak Internet eXchange peering center)
- up to 10GB of data

5. e-mail

ctp@polygrafprint.sk

- file attachment 5 MB max.
- suitable only for small amount of data, such as corrections and so on

6. Large amounts of input data

In case of large amounts of input data (several gigabytes) we recommend to split them into smaller parts or to send them on a DVD media, because of large consumption of time and increased data damage risk when sending it to FTP server.

7. Using other media type or different upload locations

Before using other media type or different upload locations, please contact us first.

8. Black&white maquette

We also require a black&white maquette (in the scale 1:1 if possible) as a supplement to your digital data.
